

GoNo® Food Finder App/API for Grocery Stores

GoNo® replaces label reading with label scanning, tells shoppers if food is good or bad for them and provides healthier alternatives including private label OWN brands. It builds indelible loyalty, increases revenue, provides invaluable shopper insights, and bolsters store brand. Our patented Efficacy Engine® is the only solution that uses computed efficacy for multiple diseases, backed by unbiased, third party, clinical studies. Personalized precision health aligns with shopper goals.

May be deployed in your App, catalog, ecommerce solution, or our private-labelled App. Integrates with ANY loyalty, reward, member, POS, or coupon system.

SYSTEMS INTEGRATION

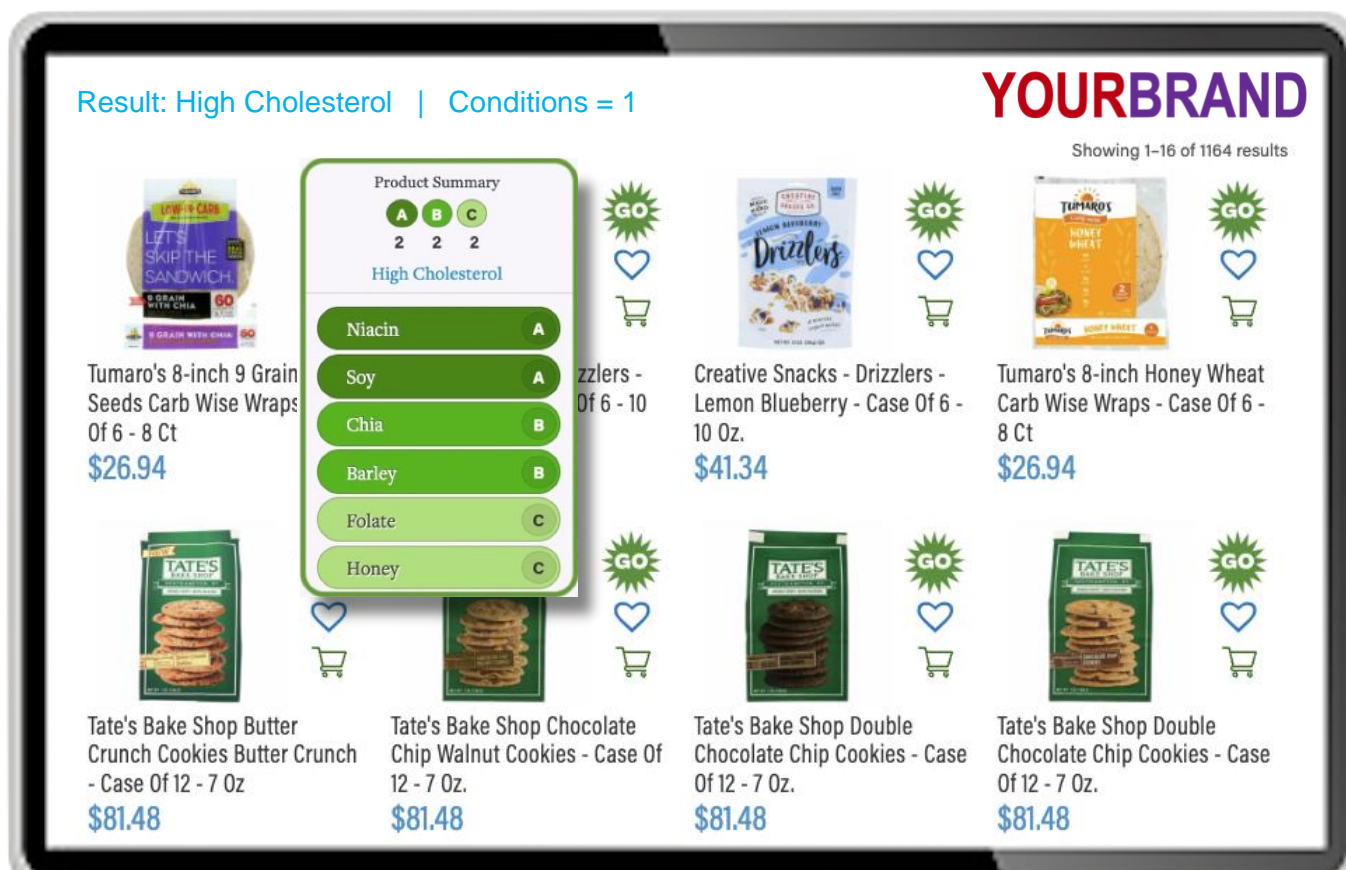

The Efficacy Engine® can be consumed in any App, Website, Catalogue, or eCommerce platform with ease. All personalized data is maintained behind a considerable security array exceeding HIPAA standards. All medical monographs and product data is standardized and can be formatted within any style construct. New products from thousands of brands are added daily through universal feeds and will include all products offered by your store.

TECHNOLOGY PARTNERS

GoNo can partner with virtually any ecommerce, loyalty, reward, coupon, recipe, meal planning, calorie counting, customer relationship management platform to deliver a combined solution with our inimitable proprietary data set that combines consumer product history, medically based recommendations, taste profile, behavioral modification, and medical outcomes.

SAMPLE ECOMMERCE SCREEN

A results page for 1 condition, High Cholesterol shows products in descending order of efficacy and can be sorted or filtered for diet, taste, likes, brand, price, ingredient rank, etc. The overlay shows detailed ratings for each condition by ingredient and links to medical evidence monographs. OWN brand results within each grading cohort can be placed first in the sort order if desired. Multiple conditions are shown together with computed efficacy results.

GoNo Food Finder

Software-as-a-Service delivered via API to any platform. To demo your own brand in our private-labeled App, visit <https://gono.pro>. Download the App and try it yourself from Apple or Android stores.
